# Historical Positions

# AIS Reported Speed Over Time

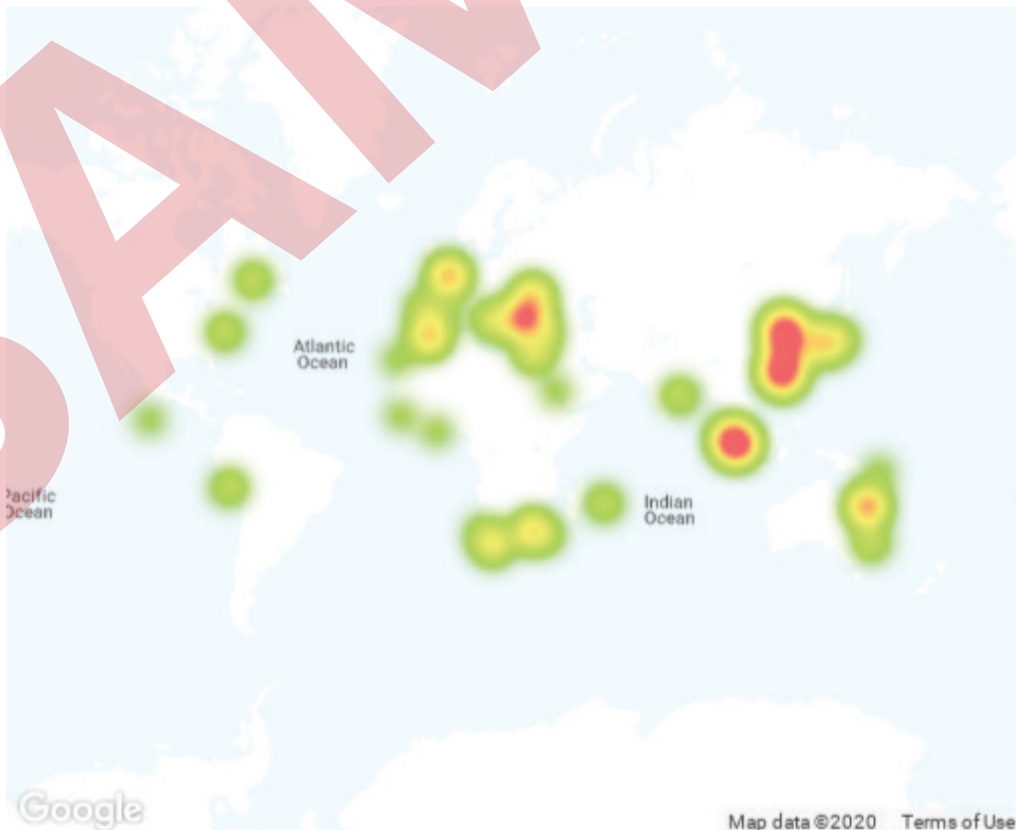

## AIS Reported Draft Over Time

## Heatmap

Grouped location of stoppages into a heatmap, shading towards red indicates higher density of stoppages.

## Notes

If you have any questions about the methodology of this report, please email us at [info@vesselsvalue.com](mailto:info@vesselsvalue.com)

### Purpose

VesselsValue (VV) has compiled this report for the purpose of mapping and tracking a specific vessel's historical activity using third party Automated Identification System (AIS) data from both terrestrial and satellite sources which is cleaned by VV, as well as information derived from the vessels AIS positions, relevant geographic information and VV's proprietary behavioural algorithms.

### Reliability of AIS Signal

Regulation 19 of SOLAS Chapter V requires certain vessels to signal their position using AIS. However, on occasion, the plotted position of the Vessel will not accurately identify the position of the vessel. This error may be due to one or more of the following or different other reasons: incorrect AIS data; issue in VV data cleaning process; non receipt of AIS data; turning off of AIS data transmitter; intentional transmission of inaccurate AIS data and other reasons.

### Date and Time

All dates and times quoted in this report are Coordinated Universal Time (UTC).
